

PAMELA ANGULO MARTINEZ

pamela.angulomtz@gmail.com | (602) 373-3801 | Phoenix, AZ

EDUCATION

M.S. in Human Language Technology at University of Arizona GPA: 3.76/4.0 Relevant coursework: Computational Linguistics, Applied Statistical NLP, Neural Networks	Tucson, AZ, USA Aug 2024 – May 2026
B.A. in (English-Spanish) Translation at Universidad Autónoma de Baja California (UABC) GPA: 97.46/100 (≈ 4.0 on U.S. scale). Relevant coursework: Morphosyntax I & II, Corpus Linguistics, Translation Technology Tools Class ranking: 1/30 Honors and awards: Academic Merit Scholarship (UABC), 2021	Mexicali, B.C., Mexico Aug 2016 – Dec 2020

PROFESSIONAL EXPERIENCE

AI Agent Builder Intern at NeuralSeek - Built a voice-activated AI assistant (SafeStep AI) on the mAIstro platform to simplify complex mobile UI navigation for elderly users, reducing safety risks and navigation errors. - Analyze datasets for quality, gaps, and risks to develop structured AI workflow concepts	Remote Apr 2026 – May 2026
Spanish Medical Annotation Subject Matter Expert at Centific - Conduct detailed annotations, transcriptions, summarizations, and translations of specialized audio and text, as well as structurization of clinical documentation using NEAT for the training of AI models. - Log daily task progress using spreadsheet tracking. - Uphold compliance with project guidelines and industry standards, KPIs, and metrics.	Remote Sep 2025 - Current
Language Specialist at Innodata Inc. - Created training datasets for LLMs to refine accuracy, fluency, coherence, and voice. - Worked with text and visual content using proprietary annotation platforms (SRT) to label and evaluate language model outputs. Projects: Meta AI, SmartGlasses. - Annotated human-generated and AI model-generated text to improve grammar and styling.	Remote May 2024 – May 2025
Research Intern at Université de Moncton, Department of Translation and Languages (Globalink Research Internship) - Contributed to an exploratory research project integrating Latin American Spanish into textbooks for Spanish language learning, drawing on peer-reviewed literature in linguistics and pedagogy. - Developed lesson plans and classroom activities for Canadian students learning Spanish as L2. - Proposed a classification of Spanish variants for pedagogical purposes (Potvin & Angulo Martínez, 2020)	Moncton, NB, Canada May 2019 – Aug 2019

SKILLS AND PROFESSIONAL DEVELOPMENT

Languages: Spanish – Native proficiency; English – Near-native proficiency; Japanese – Intermediate proficiency. Programming languages, software & tools: Python (NumPy, pandas, scikit-learn, PyTorch, spaCy, NLTK, HF Transformers, TensorFlow), R (dplyr, ggplot2), SQL, JSON, Prolog, Regex. Developer tools: Visual Studio, Git, Docker, RestAPIs, Jupyter Notebook. Operating systems: Windows 10/11, Linux (Ubuntu), Unix, macOS. NLP/ML: LLMs (Llama 3 & 4, OpenAI, Gemma4); Text classification (LR, NB, BOW), tokenization, NER, POS tagging, parsing, seq2seq/transformers, RAG, Word2vec.

CODING PROJECTS

- “Comparing Decoder-Only Transformers to a Supervised Baseline for English–Spanish Machine Translation” (2026): <https://github.com/uazhlt-ms-program/ling-582-fall-2025-course-project-code-pamela-angulo>
- End-to-end sentiment analysis pipeline with Hugging Face Transformers and PyTorch, fine-tuning BERT on 50,000+ IMDb reviews for ~88% test accuracy through efficient tokenization and feature extraction (2025): <https://github.com/pamelaangulo164/text-classification-project>
